SUMMARY

Research scientist specialized in human-computer interaction (HCI) and health informatics, with extensive experience in conducting *formative studies* to identify needs and opportunities; *iterative design and development* of novel methods and tools to support those needs; and *evaluations* to examine usage and develop design implications for future tools.

PROFESSIONAL EXPERIENCE

2020 - Present **Research Scientist, Evidation Health**

Collaboratively designs, conducts, and analyzes novel quantitative and mixed-methods studies to answer internal and client questions around health-related perspectives, behaviors, and experiences, tailoring study design to project goals (e.g., market research, patient-centered design, publication).

2014 - 2020 **Research Assistant, University of Washington**

Investigated supporting people and their health providers in collecting, analyzing, and interpreting patient-generated data to meet personalized health goals in multiple health contexts.

Conducted surveys and interviews to characterize needs and opportunities in health contexts.

Collaborated with health providers in the design and evaluation of novel prototype health apps, including mobile apps and interactive, exploratory visualizations.

Research resulted in related grants from the NSF ($500k) and the NIH ($1.5M).

More detailed descriptions available on my personal website.

Summer 2017 **Research Intern, Microsoft Research**

Conducted a feasibility study to investigate how a mobile app can support behavioral therapy.

Designed and analyzed surveys to: 1) characterize significant positive changes in anxiety, depression, and coping skill use; 2) develop a theoretical model to describe how the app supported these improvements; and 3) distill design implications for future tools.

Identified opportunities for machine learning techniques to provide personalized and context-aware suggestions to help people identify feasible and useful positive coping skills.

2013 - 2014 **Project Manager, Harvey Mudd Clinic**

Led development of a web app to provide personalized vacation recommendations for Expedia.

2013 **Undergraduate Research Assistant, Carnegie Mellon HCII**

Investigated augmentations of a chronic illness forum to help people find credible information.

EDUCATION

2014 - 2020 **University of Washington, Seattle, WA**

Ph.D., Computer Science & Engineering. GPA: 3.9
M.S. earned 12/2016
Dissertation: Goal-Directed Self-Tracking in the Management of Chronic Health Conditions
Advisors: James Fogarty, Sean Munson

2010 - 2014 **Pomona College, Claremont, CA**

B.A., Computer Science. GPA: 3.9

Skills

User Research Semi-structured interviews, surveys, field studies, observation, contextual inquiry, RITE.

Data Analysis Qualitative data analysis (e.g., coding, thematic analysis, affinity diagraming); Quantitative data analysis (e.g., R, Python, Pandas, NumPy, SciPy, Matplotlib, Seaborn).

Prototyping Prototypes, mobile and web app development (e.g., Angular, Ionic, D3.js).

Leadership Project management; communication (e.g., scientific and technical writing, presentations); diversity and inclusion advocacy.

AWARDS & HONORS

2017, 2018	Best Paper Award (CHI 2017) and Honorable Mentions (CHI 2017, DIS 2018)
2016	NSF Graduate Research Fellowship Program Awardee
2014	Marilyn Fries Endowed Regental Fellowship Recipient
2014	ARCS Foundation Fellow
2014	Harvey Mudd Computer Science Clinic Team Award Winner
2013	DREU-CRAW Participant
2013	Grace Hopper Scholarship Recipient
2010 - 2013	Pomona College Scholar

TEACHING, SERVICE, AND LEADERSHIP

Reviewer	CHI 2017-2021; CSCW 2018-2019; DIS 2018-2019; IMWUT 2019.
Teaching Assistant	Designed and graded assignments, critiqued projects, and advised UW graduate students in *CSE 510: Advanced Topics in HCI* (Winter 2018, Fall 2018).
HCI Seminar Lead	Led improvements to the Computer Science department's weekly HCI seminar and organized quarterly themes, presentations, and feedback (January 2017—June 2018).
UW CSE Graduate Admissions Volunteer	Coordinated one-on-ones with faculty and current graduate students and organized social activity (Winter 2018); reviewed graduate student applications (Fall 2016).
Orientation Leader	Organized orientation for the new Computer Science graduate students (Fall 2016).
Writing Fellow	Worked with Pomona students to improve their writing (Fall 2011—Spring 2014). Senior Science Fellow for the 2013/2014 academic year.
